Office Action Summary

Application No.

09/927,049

Applicant(s)

TANAAMI, TAKEO

Examiner

William H. Beisner

Art Unit

1744

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 January 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 68-83 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 68,69,72,76, 77 and 80 is/are allowed.
- 6) ☒ Claim(s) 70,71,73-75,78,79 and 81-83 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

2e

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 70, 71, 74, 75, 78, 79, 82 and 83 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 70, 71, 74, 75, 78, 79, 82 and 83 are all drawn to a device that includes the combination of electrodes provided with *protrusions* and are *transparent*. Review of the originally filed specification and/or claims fails to convey to one having ordinary skill in the art that at the time of filing the application that the combination of electrodes with protrusions that are also transparent were considered to be part of Applicants' invention. Review of the originally filed specification and claims reveals to one of ordinary skill in the art at the time the invention was made that the use of electrodes with protrusions and transparent electrodes are considered alternative embodiments rather than a single combined embodiment (See page 8, lines 11-16 and originally filed claims 1-9, especially claims 4 and 7).

Claim Rejections - 35 USC § 102

Art Unit: 1744

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 73 and 81 are rejected under 35 U.S.C. 102(b) as being anticipated by Heller et al.(US 5,605,662).

With respect to claim 73, the reference of Heller et al. discloses a hybridization detection device that includes a container, the container is defined by elements (59), (54) and the permeation layer (See Figures 5 and 6), that contains known biopolymer segments (See binding entities of Figures 5 and 6) fixed onto an inner wall (permeation layer) of the container which bind with unknown biopolymer segments existing in a solution contained within the container. The container is removable relative to the measuring device (electrode circuit board (52) is removable relative to the container structure) where the measuring device includes one or more electrodes (62) disposed adjacent the container for applying an electric field to the container. The electrodes (62) are electrically insulated (See column 14, lines 52-60) from the container and include protrusions (62, See Figure 6) formed at spatial positions (See microlocations (55) of Figures 5 and 6) corresponding to the locations of fixed known biopolymer segments. With respect to the requirement that the electrodes mechanically contact the container, while the protrusions (62) do not mechanically contact the container, the electrode circuit board (52) that includes the electrodes does mechanically contact the container (See Figure 6 and related

Art Unit: 1744

disclosure). As a result, the mechanical contact of claim 73 is considered to be met by the disclosure of the reference of Heller et al.

With respect to claim 81, the disclosed system includes a structure for altering the direction of the electric field form removing unbound biopolymers (See column 16, lines 6-9).

Allowable Subject Matter

5. Claims 68, 69, 72, 76, 77 and 80 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter:

With respect to claims 68, 69, 72, 76, 77 and 80, the prior art of record fails to teach or fairly suggest the combination of the claimed externally located electrodes having protrusions with additional conductive members provided on the container at the locations of the fixed known biopolymer segments.

Response to Arguments

7. Applicant's arguments (See page 1 of the response dated 1/19/2005) with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.

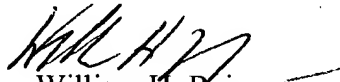

Conclusion

Art Unit: 1744

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Beisner whose telephone number is 571-272-1269. The examiner can normally be reached on Tues. to Fri. and alt. Mon. from 6:15am to 3:45pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Kim can be reached on 571-272-1142. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
